Office Action Summary

In a response of 8/6/02 to a restriction requirement of 7/1/02, applicants elected Group I claims 1-37 without traverse.

Claims 38 and 39 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being
5 no allowable generic or linking claim. Election was made without traverse in Paper No. 7.

Claims examined on the merits are 1-37.

The following is a quotation of the first paragraph of 35 U.S.C.

112:

10 The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

15 Claims 1-37 are rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for a device as required by claims 1, 3 and 5 in combination, does not reasonably provide enablement for other substantially different embodiments. The
specification does not enable any person skilled in the art to which it
20 pertains, or with which it is most nearly connected, to make and use the invention commensurate in scope with these claims.

The specification fails to support that the disclosed results can be obtained with a device without structure as required by claims 1, 3 and 5 in combination. The claimed invention must be commensurate in scope with
25 the working examples carried out.

The claims are free of the prior art.
